

# The Healthscan Advantage

*A Scientific, Single Score Analysis of Your Health*

---

Healthscan creates a physician design and approved Health Risk Assessment for individual's ages 12 thru 75 years. See what your Health Risk score is and develop a plan to improve risk values.

Healthscan lets you securely log in your prescription data and have unlimited access to your health assessment and prescription therapy "world wide". Travel and visit any physician, and thru the secure Healthscan web site you can have access to your health risk data and prescription therapy.

Do you visit multiple doctors ? Receive prescription recommendations from different physicians ? From homoeopaths ? From Health Club professionals ? Keep all your personal records in one secure location and change them as often as required, no-charge !!

Take the Healthscan Risk assessment and measure how effective your medications are actually working !

Has exercise improved your Health values ? Are your natural medications or physician prescription working effectively as they should ? Is the medication you're taking cost effective?

Take control of your Healthcare and share your data when you want to - with any professional care giver.

Use your Healthscan System to keep you records safe and secure while measuring your Health improvements; through lifestyle changes and or therapeutic consumption.

Healthscan is Medicare approved and is covered through most insurance programs - See your consulting physician or pay a simple co-pay and complete future Healthscan Risk Assessments "on-line".....
